

CZ-USB-1

PROXIMITY CARD READER

The CZ–USB–1 reader plugs directly to a computer USB port. It enables quick and easy reading of proximity cards, tags, etc. in the DLOADX program as well as in ACCO Soft and ACCO–SOFT–LT softwares. This makes it possible to assign new 125 kHz passive transponders to the users without leaving the computer.

- operation in Windows environment
- operation at a frequency of 125 kHz
